

I feel I am the one paying for the phone service and equipment inside my home, and in light of that fact, I believe I should be able to control who I would want calling my phone number. I do not pay for phone service to be inundated with commercial calls of any type, and certainly do not want to be bothered with them when I am home relaxing after a long day as a customer service rep!!! I am on the phones all day, and the last thing I want is to be dunned by corporations, and telemarketers!!! If these people want to start picking up my service/equipment charges, I will be more than happy to get their calls, but until then, DO NOT CALL!!!!!!!!!!!!
